- A seeker / wannabe teacher can request a 1:1 meeting.
- Ability to chat & share location (connect with whatsapp?)

General Instructions

- UI/UX Design: Take all the freedom to design the UI that you think is right. Unleash your creativity.
- Server:
 - Preferably use a hosted server like Google Appengine / Parse / Linode etc. In that is not possible, you can run the server in your own laptop.
 - Preferably use websockets for instant realtime updates.
- You can form teams up to 3 members per team.
